

# Powell Equipment Sales Company

*\* For your powder and bulk material handling solutions \**

## Equipment Line List

**Cyclonaire:** Dilute, semi-dense & dense phase pneumatic conveying systems with a complete line of propriety components & accessories that enhance your pneumatic conveying system or complete it. Components are available as a single unit or grouped together to form a complete system. Innovation starts with our state-of-the-art engineering, and we can demonstrate the solution at our world-class testing facility. This creates the foundation for long lasting relationships with our customers. [www.cyclonaire.com](http://www.cyclonaire.com)

**Hapman:** Effective Solutions All Performanted™ : Helix/Flexible screw and tubular drag conveyors, mini vac pneumatic conveying, bag dump stations and compactors, bulk bag fillers and unloaders, lumpmaster/lumpbreaker, screw feeders, solid quid (powder and liquid delivery systems). [www.hapman.com](http://www.hapman.com)

**Hayes & Stolz:** High performance mixing and material handling equipment: Batch mixers, continuous blenders, bucket elevators, distributors, gates, valves, rotary scalpers, horizontal coolers and coaters. [www.hayes-stolz.com](http://www.hayes-stolz.com)

**Industrial Magnetics:** Is a leader in providing both permanent magnets and electromagnets for magnetic separation to provide consumer and capital equipment protection. IMI specializes in custom fabricating. They design, engineer and manufacture magnetic separation devices for customers' specific requirements, and take pride in the quality and performance of their products, personalized service, and innovative solutions. [www.magnetics.com](http://www.magnetics.com)

**Inpro/Seal:** Is a world leader in the design and manufacturing of permanent bearing protection and complete shaft seals for rotating equipment. Since 1977 Inpro/Seal has delivered innovative sealing solutions that improve the reliability of rotating equipment around the globe. Products include the original Bearing Isolator and the Air Mizer shaft sealing solution, Non-Contacting, Zero Maintenance and Energy Efficient. [www.inpro-seal.com](http://www.inpro-seal.com)

**InterSystems:** Automatic industrial samplers used to extract samples of free-flowing materials such as powders, coal, aggregate wood chips, plastics and liquid. The design and operation of the sampler eliminates issues inherent with hand sampling methods and provides a representative and repeatable sample. InterSystems samplers can be used in gravity, pneumatic or liquid lines and can be installed in chutes, hoppers and at the end and middle of moving belts. Automatic samplers come complete with controls and accessories, such as collection carousels. [www.intersystems.net](http://www.intersystems.net)

**Metso/Best:** Precision engineered solutions for bulk material handling includes: Industrial air-powered and electric vibrators, vibrating tables, vibratory feeders, screeners and conveyors, twin-screw feeders, bulk bag loaders, unloaders and bag dump stations to total bulk processing systems. [www.bestvibes.com](http://www.bestvibes.com)

**Monitor Technologies LLC:** Provides practical solutions in level measurement instrumentation for the powder and bulk solids markets. Products include: cable-based level sensors, guided wave radar, rotary paddle switches, RF capacitance probes, vibratory probes, microwave solids flow detectors and indicators, dust alarm broken bag detectors, diaphragm switches, aeration products and more.
